Projects

Design Manager – Discord
January 2020 — Today

- I've been mentoring, coaching, and leading a team of five designers on Discord's Growth organization.
- I've helped set and contribute to our product strategy for Growth from yearly plans to individual experiment product specs.
- Created and led various processes for the larger Design team such as onboarding resources, guides for hiring, contributing to the design system, etc.

Senior Product Designer – Discord
March 2018 — January 2020

- I designed and shipped multiple video and screensharing features for Discord which are now used by tens of millions of people everyday.
- Owned several growth experiments and features end to end, such as phone registration, onboarding improvements, and contact book syncing. Each of which had a positive MAU impact.
- I love being part of the team by participating in design critiques, contributing reusable components to the design system, and helping with interviews.
- Built and open-sourced design tools (Figma Plugins) to automate various design tasks which saved us time and helped to build the Discord design brand.

Experience

Internship Java Developer
Aug 2020 — Nov 2020

- Developed demo app for testing data.
- Developed QR reader app for extract health insurance code.

Education

FPT POLYTECHNIC HCM
2018 - 2021 // HCM CITY - VN

Skills

Programming Languages

JavaScript, Java, TypeScript, HTML, CSS/Sass

Libraries & Frameworks

React, Strapi, Nodejs, Express, NextJs, NestJs, Spring, ChakraUI

Tools & Platforms

Git, Vercel, Strapi, Docker, Linux, Figma

Interests

Drones, languages, animal...etc
